Cassius Vision: Open your eyes to healthcare intelligence.

Designed for Healthcare Reporting

Cassius Vision delivers enhanced reporting for all of Ardentia's reporting modules and business solutions. This reporting can be delivered from HealthWare, Ardentia's data warehouse and data management solution.

Briefing Books

Build web-based 'Briefing Books' of information tailored to different end users. These can contain websites, Excel spreadsheets, Word documents and more, to ensure managers get the information they need.

Powerful Analytics

Online analytical processing (OLAP) functionality lets you view data any way you like in seconds.

FusionCharts

Cassius Vision incorporates FusionCharts, which are both striking and functional.

Role-based Access

By assigning each user a role, administrators can readily control the amount of information available to users when they log in to Cassius.

Cassius Vision can help you get the right information to the right people at the right time to better understand the patient care pathway.

Ardentia's web-based reporting and analysis tool has been specifically designed to give healthcare managers and clinicians instant access to the information they need to make key business decisions in today's emerging healthcare managed market.

- A complete information analysis and report delivery solution developed to support the needs of modern healthcare business intelligence.
- Develop business intelligence at the interface between health and social care organisations which will follow the patient pathway.
- Increase organisational efficiency and productivity.
- Maximise your investment in Ardentia reporting modules and business solutions by giving key decision makers the ability to access relevant information whenever and wherever they need it, saving time and money.

"Through using Briefing Books staff can identify areas where improvements need to be made, and also evaluate those departments performing well in order to extend these successful management processes Trust-wide, to boost overall performance."

Sarah Coombs, Information Business Development Manager
Northern Lincolnshire & Goole Hospitals NHS Foundation Trust
