

Efficient theatres are
productive theatres.

REPORTING MODULES

Theatres: Radically improve your operating theatre efficiency.

Made for HealthWare

The Theatres reporting module has been designed to analyse and report on data stored in Ardentia's HealthWare data warehouse solution, which pulls together and cleans data from multiple source systems to provide a central source of reliable, accurate data for your organisation. Theatres data are loaded into HealthWare using an extract from your existing theatres information system

Delivered via Cassius

Reports and analysis are delivered to end users using Cassius Vision, our web-based reporting and analysis tool.

'The Productive Operating Theatre'

Ardentia's Theatres reporting module provides the data required as part of 'The Productive Operating Theatre' programme - designed by the NHS Institute for Innovation and Improvement to improve quality and efficiency in the operating theatre.

Operating theatres are an expensive asset, but with the right information you can transform their productivity.

Ardentia's Theatre Performance Manager lets you monitor and report on operating theatre sessions, enabling you to identify specific areas where efficiency can be improved, thereby increasing theatre utilisation and leading to a better patient experience.

- Gather evidence to improve theatre efficiency and make the most of one of your most important assets.
- Analyse a range of measures by specialty including theatre utilisation, capacity, session cancellations, over and under-runs, operating time and procedures.
- Patient operation information, for coordinating patient flow.
- Improve patient experience and reduce waiting times.
- Collect data to support 'The Productive Operating Theatre'

"Theatres represent one of the single biggest productivity opportunities in any acute trust. Even if you think your theatres are working well, the productivity benefits of The Productive Operating Theatre, very quickly add up."

Matthew Lowry, Deputy Chief Executive & Chief Finance Officer
The Rotherham NHS Foundation Trust
