

Project Manager – Software (Solutions) Implementation

Ardentia Ltd is a leading supplier of innovative business intelligence and data warehouse solutions based in Staffordshire. Due to continuing success, there is a requirement for a commercially orientated Project Manager to manage the delivery of multiple Business Intelligence focused solutions to a number of high-profile customers. The Project Manager will have overall responsibility for ensuring the product is delivered to customer expectations, on-time, to budget together with responsibilities for co-ordination and reporting to management.

The successful applicant must have a proven track record and demonstrate success in a similar role with good written and verbal communication skills, excellent project planning, scheduling and management skills together with problem solving abilities.

Applicants should be able to demonstrate experience in managing significant projects and have excellent motivational skills with the ability to encourage good communications between the project team, customers and related projects or suppliers.

The applicant must have experience in managing, mentoring and building teams through internal progression as well as external recruitment.

Primary Requirements

- Proven track record in an IT project management role
- Control of project revenue in excess of £2.5m
- Full IT development life-cycle management experience
- Proven project planning and scheduling skills
- Proven ability to deal effectively with customers, partners and staff at all levels
- Strong written and verbal communications skills
- Ability to manage progress and use of resources, including internal, customer and 3rd party teams.
- Ability to handle exceptions and problems escalated from the project teams
- Ability to direct and motivate the project teams
- Ability to manage business and project risks, including the development of contingency plans
- Understand business issues and empathise with customers and users.
